| <b>Title:</b>               | Redeploying due to host failure                                                                                                                                                                                                            |
| <b>Summary:</b>             | We're sorry, your virtual machine isn't available and it is being redeployed due to an unexpected failure on the host server. Azure has begun the auto-recovery process and is currently starting the virtual machine on a different host. |
